NEW OSHA REQUIREMENTS. YOU MUST BE IN COMPLIANCE BY
DECEMBER 1, 2013

GLOBALY HARMONIZED SYSTEM

- Hazcom is a top 10 OSHA violation. Don't be a part of that!
- The new format requires 16 specific sections, ensuring consistency in presentation of important protection information.
- Chemical manufacturers and importers must provide a label that includes a signal word, pictogram, hazard statement, and precautionary statement for each hazard class and category.
- The basic goal of an effective hazard communication program is to ensure employers and employees know the identities and hazards of chemicals in their workplaces. When employers and employees have such information, it can be used to design and implement appropriate protective measures to reduce the incidence of adverse effects.
