

Making The World A Safer Place One Company At A Time

Meiners Safety partners with WorkSafe for Audiometric Testing Services

The HearSafe Group provides Audiometric Testing for your Hearing Conservation Program. We are a **National Provider** and have been in business for 23 years! We provide **Clinic Quality** hearing testing just like a doctor's office by setting up a **BOOTH(S) INSIDE** your facility for a **more private, accurate, professional, and quiet** hearing test while avoiding loud generators and the rain, heat, snow, cold, etc.. that mobile units have to work around because they are testing outside.

- delivers reports in 24-48 hours so you can respond to a STS in a timely manner,
- reduces lost production time so only 3 employees are stepping away from their job at a time (1 in the booth, 1 waiting, and 1 returning back to work),
- provides training and education that meets OSHA requirements,
- can customize our testing flow from 15 to 150 test per hour by using multiple technicians and multiple booths,
- performs 15 tests per hour (3 tests every 12 minutes),
- provides training and education at NO additional charge,
- transfers previous historical data (digital or handwritten) at NO additional charge,
- and, much more!

Call Chris Meiners for more information or to get set up for the testing (502) 641-9554

Testing inside your climate control facility
